

## Isis - Subtitle Preview Generator

Generates a visible caption preview copy for customer review and approval

This software creates a permanent overlay of closed caption World System Teletext, or open caption subtitles, onto Windows Media video files. This enables preview copies of a broadcast file to be processed quickly and easily and avoids the need for any external video processing hardware. The resulting preview copy can be electronically transferred to a client (or burnt to a DVD) and thereby eliminates the need to create and ship preview tapes for client approval of closed, or open, caption projects.

The software operates via an intuitive drag and drop user interface and supports industry standard caption file formats.

User interface

## KEY FEATURES

-  User friendly GUI drag and drop file management screen

### Inputs:

-  Windows Media or SpectreView encoded MPEG video files
-  Closed caption file in EBU .stl format or open caption Sonic Scenarist .sst format (other file formats supported on request)

### Output:

-  Windows Media video file with burnt in subtitles

## Technical Specifications

### PC requirements

Isis Subtitle Preview runs on Microsoft Windows XP Professional or Vista.

A *minimum* PC specification should be:

-  Pentium class processor running at 3.0 GHz
-  1GB RAM
-  Gigabit Network capability
-  For bitmap subtitles, the subtitle font must be installed and available to Windows.
