

## Isis Subtitle File QC Service

Automated service for quality control of subtitle files

Isis Subtitle File QC Service is a Windows based software application for automatically quality checking industry standard closed caption or open subtitle files. It has a number of options available that include multiple folder configurations and auto correct of common file problems. The application runs as a Windows service and will automatically process any file that appears in the 'Source' folder. Files are then moved to either a 'Pass' or 'Fail' folder and a report created in a Text or HTML format.

The application includes a comprehensive file viewing capability that includes viewing the caption file text, previewing a rendered on-screen view (with correct positioning and justification) and viewing the caption Hex data.

It will prove useful to anyone involved with the creation, editing or processing of closed caption and subtitle files for broadcast, DVD or web delivery.

## Key features

- Runs as an automated service
- Comprehensive reports with option of automated e-mail delivery
- Displays the full EBU Header block information
- Displays selected caption text and a rendered preview with correct justification
- Display option to show raw Hex Teletext data
- Option to view the control characters on the rendered view
- Supports multiple QC folder sets and multiple file formats
- Operates on EBU .stl, .pac and .cap (line 21) closed caption files and .srt open subtitle files

## Comprehensive QC includes:

- Extensive checks on the validity of header block information
- Check that Max displayable characters per row is valid
- Check that caption In Time  $\geq$  overall In Time
- Check that caption Out Time  $\leq$  overall Out Time
- Check that next caption In Time  $\geq$  current caption time (overlapping caption)
- Check that next caption overall In Time  $\geq$  current overall out time
- Programmable 'House Style' checks
  - Caption duration  $\geq$  Minimum duration
  - Caption duration  $\leq$  Maximum duration

## PC requirements

Operating system - Microsoft Windows 7 (preferably 64bit) or Windows 2008 R2 server.

The PC hardware should have the following recommended minimum specification: Intel i5 or dual-core Xeon processor at 2.5GHz (or equivalent AMD processor), 4GB RAM (8GB for 64bit OS).

## Licensing

The application is protected by means of a hardware security dongle. In multiple system networked environments, a central server licensing model is used to distribute licences as required.
